PROFILE

Hi! I am Kvirike Kemularia. As a passionate and dedicated beginner software developer, I am eager to contribute my skills to the world of programming. My adaptability, combined with a commitment to continuous learning, allows me to try new challenges with enthusiasm. I am excited about any new opportunity to grow as a software developer and contribute to innovative projects. I always had a strong interest in technology, and that have brought me to step my foot in coding. Although my academical studies and what I practiced in the past in not directly related to coding, I strongly believe that in this modern world main skill one should have is the ability to acquire new skills, for that reason and with my strong will of success I'm trying myself in this field and willing to do whatever it takes to be a software developer. For more information about me and the work I've done please this view cv down below and my portfolio page right here: <https://kvirike.github.io/my-portfolio>
